

## Stop the Attack on the Clean Water Rule

### *Protect Colorado's Drinking Water*

The Clean Water Rule was recently finalized by the Obama administration after years of planning, 400 stakeholder meetings, and more than a million public comments. It safeguards our water and restores protections to the drinking water sources for 1 in 3 Americans. This includes the drinking water for more than 2 in 3 Colorado residents. **The Clean Water Rule is a strong, commonsense policy that makes clean water a priority throughout the nation.** If Congress blocks the Clean Water Rule, at least 68% of Colorado's stream miles and millions of acres of wetlands nationwide will again be at risk from pollution and destruction from development, oil and gas production, and other industrial activities. Blocking this rule would imperil drinking water sources, as well as the small businesses and communities that rely on clean water.

*Cherry Creek Reservoir – CO State Parks*

- **70% of Coloradans** get their drinking water from sources that rely on small streams that are protected by the Clean Water Rule.
- **Protections were restored to 10,509 miles of streams** that feed into Colorado's drinking water sources.
- **Thousands of acres of wetlands** that provide flood protection, recharge groundwater supplies, filter pollution, and provide essential wildlife habitat are safeguarded.

### **Rule Provides More Economic Benefits than Costs**

- **The Clean Water Rule restores, but does not expand, the historic coverage of the Clean Water Act.** EPA estimates that the rule will provide **at least \$339 million and up to \$572 million annually in benefits** to the public, including reducing flooding, filtering pollution, providing wildlife habitat, supporting hunting and fishing, and recharging groundwater.
- **Protecting small streams and wetlands supports fish, wildlife and Colorado's vibrant recreational industry.** The U.S. Fish and Wildlife Service reports that in 2011, \$3 billion was spent on wildlife recreation in CO, including \$649 million on fishing, and more than 2.3 million people participated in these recreational activities in Colorado.
- **Colorado's thriving brewing industry relies on clean water.** Small Colorado breweries contribute over \$1.6 billion to our economy every year and support more than 19,200 jobs.

### **Colorado Clean Water Rule Supporters**

- **Over 34,000 Colorado residents, out of more than 800,000 Americans, support the rule.**
- Over 25 conservation, environmental, faith-based and union organizations, representing thousands of Coloradans.
- 43 Colorado elected officials signed a letter in support of the rule.
- Recent polling shows that 79% of Americans want Congress to let EPA implement the Rule.
