

Stop the Attack on the Clean Water Rule

Protect New Hampshire's Drinking Water

The Clean Water Rule was recently finalized by the Obama administration after years of planning, 400 stakeholder meetings, and more than a million public comments. It safeguards our water and restores protections to the drinking water sources for 1 in 3 Americans. This includes the drinking water for nearly 2 in every 5 New Hampshire residents. **The Clean Water Rule is a strong, commonsense policy that makes clean water a priority throughout the nation.** If Congress blocks the Clean Water Rule, at least 55% of New Hampshire's stream miles and millions of acres of wetlands nationwide will again be at risk from pollution and destruction from development, oil and gas production, and other industrial activities. Blocking this rule would imperil drinking water sources, as well as the small businesses and communities that rely on clean water.

- **38% of New Hampshire residents** get their drinking water from sources that rely on small streams that are protected by the Clean Water Rule.
- **Protections were restored to 1,311 miles of streams** that feed into New Hampshire's drinking water sources.
- **Thousands of acres of wetlands** that provide flood protection, recharge groundwater supplies, filter pollution, and provide essential wildlife habitat are safeguarded.

Rule Provides More Economic Benefits than Costs

- **The Clean Water Rule restores, but does not expand, the historic coverage of the Clean Water Act.** EPA estimates that the rule will provide at least \$339 million and up to \$572 million annually in benefits to the public, including reducing flooding, filtering pollution, providing wildlife habitat, supporting hunting and fishing, and recharging groundwater.
- **Protecting small streams and wetlands supports fish and wildlife and New Hampshire's vibrant recreational industry.** The U.S. Fish and Wildlife Service reports that in 2011, \$554 million was spent on wildlife recreation in New Hampshire, including \$209 million on fishing, and more than three-quarters of a million people participated in these recreational activities throughout the state.
- **New Hampshire's thriving brewing industry relies on clean water.** New Hampshire breweries contribute almost \$250 million to our economy every year and support more than 3,100 jobs.

New Hampshire Clean Water Rule Supporters

- **More than 5,600 New Hampshire residents, out of more than 800,000 Americans, support the rule.**
- New Hampshire joined 34 other states in 2006 to urge the Supreme Court to uphold strong federal clean water protections.
- Recent polling shows that 79% of Americans want Congress to let EPA implement the Rule.
