

Stop the Attack on the Clean Water Rule

Protect West Virginia's Drinking Water

The Clean Water Rule was recently finalized by the Obama administration after years of planning, 400 stakeholder meetings, and more than a million public comments. It safeguards our water and restores protections to the drinking water sources for 1 in 3 Americans. This includes the drinking water for more than 1 in every 2 West Virginians. **The Clean Water Rule is a strong, commonsense policy that makes clean water a priority throughout the nation.** If Congress blocks the Clean Water Rule, at least 60% of West Virginia's stream miles and millions of acres of wetlands nationwide will again be at risk from pollution and destruction from development, oil and gas production, and other industrial activities. Blocking this rule would imperil drinking water sources, as well as the small businesses and communities that rely on clean water.

Stream feeding into the New River in WV

- **54% of West Virginians** get their drinking water from sources that rely on small streams that are protected by the Clean Water Rule.
- **Protections were restored to 8,390 miles of streams** that feed into West Virginia's drinking water sources.
- **Thousands of acres of wetlands** that provide flood protection, recharge groundwater supplies, filter pollution, and provide essential wildlife habitat are safeguarded.

Rule Provides More Economic Benefits than Costs

- **This commonsense proposal restores, but does not expand, the historic coverage of the Clean Water Act.** EPA estimates that the rule will provide at least \$339 million and up to \$572 million annually in benefits to the public, including reducing flooding, filtering pollution, providing wildlife habitat, supporting hunting and fishing, and recharging groundwater.
- **Protecting small streams and wetlands supports fish and wildlife and West Virginia's vibrant recreational industry.** The U.S. Fish and Wildlife Service reports that in 2011, \$1.2 billion was spent on wildlife recreation in WV, including \$429 million on fishing, and more than 1.2 million people participated in these recreational activities in West Virginia.
- **West Virginia's thriving brewing industry relies on clean water.** West Virginia breweries contribute almost \$120 million to our economy every year and support more than 1,100 jobs.

West Virginia Clean Water Rule Supporters

- **More than 2,100 West Virginians, out of more than 800,000 Americans, support the rule.**
- Groups like the Warm Springs Watershed Association, Trout Unlimited, and the Recreation Department of Beckley, WV support protections for clean water.
- Recent polling shows that 79% of Americans want Congress to let EPA implement the Rule.
